WAISMAN
CENTER

Do you wear a cochlear implant for **single-sided deafness**?

Help us learn more about:

How the brain processes binaural information

How you are able to localize sounds

How you understand speech in noisy environments

Adults with one cochlear implant for single-sided deafness are invited to take part in our research studies.

Criteria:

→ **Cochlear Implant in one ear**

→ **Normal or near-normal hearing in the non-implanted ear**

→ **No other known disability**

Participants will spend 3 days at our facilities in Madison, WI. Typically, you would arrive the evening before testing begins and stay in a comfortable nearby hotel.

For more information or to make an appointment, contact:
