

Study on Children's Hearing

Waisman Center

Ruth Litovsky, Ph.D., Director

We are studying how children locate sounds in noisy environments, such as classrooms, and how we can use lights to help them locate sound better.

Children ages 4 to 17 who have typical hearing are invited to participate in our research study. The experience is fun and rewarding for both parents and children.

Participation will be compensated (\$7.50/hr)

To participate, please contact:

Shelly Godar

Phone: 608-262-7483
