

Be a part of the first study for children with

**Down
Syndrome**

**Autism Spectrum
Disorder**

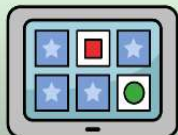

**Fragile X
Syndrome**

to combine:

brain imaging

thinking games

hearing tests

talking games

Who can help?

Children with and without *Down syndrome*, *autism spectrum disorder*, and *fragile X syndrome* who are:

- **10 to 17** years of age
- Use **English as their first language** with 2- to 3-word utterances

What is involved?

We would like you and your parent to come for multiple visits (~15 hours total) where we will complete:

- MRI brain scan
- Hearing games
- Cognitive and language assessments

Payment for Participation:

\$15/hour, plus an additional \$50 for the MRI scan

*Families traveling over 60 miles will receive mileage reimbursement and may receive lodging if deemed appropriate
